

# ANCHOR

*... leading the field in  
manufacturing and selling  
of mixers since 1925*

The Anchor Manufacturing Company has led the field in manufacturing and selling mixers with a sound, functional design and a long dependable life since 1925. Close contact with the contractor, coupled with a keen interest in the industry has enabled us to manufacture a mixer of superior quality. Modern manufacturing techniques enable us to market a superior mixer at a very competitive price.

## 4's

### #4 SERIES MIXER

Ideal for small jobs, repair work, alteration work. These mixers are built with the refinements built into the larger Anchor Mixers. Clutch conveniently located, high torque, trouble free eccentric type sealed ball bearings, sealed gear reduction unit, Duo-Tread two position axle for road towing and going thru a 30" opening or a high speed trailing axle 48" wide overall. Exclusive spiral elliptical blades for fast and thorough mixing of plaster, mortar when using sand, light weight aggregates, coloring, etc.

### MIXER SPECIFICATIONS

- |                             |                                 |                         |                                     |
|-----------------------------|---------------------------------|-------------------------|-------------------------------------|
| • Mixing Capacity .....     | 4 Cubic Feet                    | • Frame .....           | Tubular — High Torque               |
| • Drum size .....           | 28" Diameter, 19" long          | • Hauling Hitch .....   | Retractable                         |
| • Drum and Heads .....      | 10 Ga. — Welded                 | • Axle .....            | High Speed Trailing 48"             |
| • Drum Shaft .....          | 1 $\frac{1}{16}$ CRS — 34 RPM   | • Wheels .....          | Disc — Tapered Roller Bearings      |
| • Drum Shaft Bearings ..... | Sealed Ball Bearing             | • Tires .....           | 5.70 x 5.00 x 8" Pneumatic 18" Dia. |
| • Drum Shaft Seal .....     | Packing Gland Type              | • Charging Height ..... | 42"                                 |
| • Blades and Paddles .....  | Spiral Elliptical               | • Dump Height .....     | Std — 20"                           |
| • Drive .....               | V-Belt to Sealed Gear Reduction |                         | With Spacers — 28"                  |
| • Clutch .....              | Hand Lever — Eccentric          | • Power .....           | Gasoline or Electric                |
| • Tilt Mechanism .....      | Hand Lever and Drum Roll        |                         | (See Reverse Side of Page)          |

## #4 Series Mixer Power Options

**W-6**

6.5 H.P. Wisconsin, air cooled gasoline engine, 1.45 gallon fuel tank, 1.6 pint oil capacity, rope start. Capable of handling lightweight plaster and mortar, slurries.

**W-7**

7.2 H.P. Wisconsin air cooled gasoline engine, 1 gallon fuel tank, 2 pint oil capacity, rope start. Capable of handling mortar, plaster, insulation, slurries.

**K-8**

8 H.P. Kohler air cooled gasoline engine, 1½ gallon fuel tank, 2½ pint oil capacity, rope start. Capable of handling mortar, plaster, insulation, slurries.

**E-1**

1 H.P. Dyna 110 volt single phase electric repulsion induction motor. Single throw start and stop switch, pigtail furnished.

**E-1½**

1½ H.P. Dyna 110/220 volt single-phase electric repulsion induction motor. Dual voltage start and stop switch, 50' motor cable and pigtail furnished.

## Equipment Options

**L**

High Speed Trailing Axle

**S**

Duo Tread Axle

**R**

Rubber Blades

Drum Liner

Frame Spacers

Drum Restrictors
